RE: Access to the Arkwood Inc. Site

Mr. Grisham:

The U.S. Environmental Protection Agency (EPA) is pleased to facilitate your access to the Arkwood, Inc. site. As the Executor of the Estate of Mary Burke Grisham, the owner of the Site, you have access to the Site, upon providing two business days' notice. There are other conditions as well which are integral to all Superfund sites, both PRP-lead sites such as the Arkwood Inc. site and Fund-lead sites, which are sites at which the remedial activities are conducted by the EPA.

All visitors to Fund-lead sites are required to comply with certain general conditions before access is granted. Each visitor to a Fund-lead site is required by EPA to sign in on a visitor's log, listen to a safety briefing, and be escorted at all times on the property. These are minimum requirements for access that are applicable at PRP-lead sites as well. These minimum requirements will ensure the safety of all visitors and result in the protection of the remedial measures implemented at the Superfund Site.

Please know that the EPA will continue to facilitate access by you to the Site. However, it is important that you comply with these minimum general requirements that are applicable at all Superfund sites.

If you have any questions, please do not hesitate to contact Stephen Tzhone, the Remedial Project Manager for the Arkwood Site, at tzhone.stephen@epa.gov.

Thank you for your cooperation.

Sincerely,

Gloria Moran
Gloria Moran
